

HOTEL, MIXED USE AND COMMERCIAL PROJECTS

**THE CONSTRUCTION PLUS
(PACE) PROGRAM**

WHAT IS THE CONSTRUCTION PLUS (PACE) PROGRAM?

THE CONSTRUCTION PLUS (PACE) PROGRAM combines Property Assessed Clean Energy (PACE) financing with top regional and national construction lenders to provide the highest LTV (Up to 90%) construction financing available in the market. We eliminate the need for high interest mezzanine and preferred equity by financing your project with a low interest PACE assessment combined with a PACE approved senior construction lender.

CONSTRUCTION PLUS (PACE) PROGRAM

UP TO 90% LTV CONSTRUCTION FINANCING

THE CONSTRUCTION PLUS (PACE) PROGRAM includes funds for up to 100% of all energy savings improvements including hard and soft costs up to 90% LTV.

Developers can reallocate valuable equity to be used on other projects or budgetary items

HIGHER PROPERTY CASH FLOW AND VALUE

HIGHER CASH FLOW – LEED or GREEN certified buildings realize substantial savings on utility and water bills along with lower maintenance costs. All of these savings travel to the bottom line giving owners increased NOI and project ROI.

HIGHER OCCUPANCY – LEED or GREEN certified buildings are more efficient and comfortable resulting in higher occupancy, longer stays and more return customers or tenants.

GREATER MARKETABILITY – LEED or GREEN certified energy efficient buildings substantially increase the marketability and retail pricing for your building to potential buyers upon sale.

LOWER BLENDED INTEREST RATE

LOWER BLENDED RATES – By eliminating high interest Mezzanine debt and preferred equity the Green Pace companies secure both your PACE assessment and Senior financing resulting in a much lower blended interest rate.

PACE PRE-APPROVAL IN PLACE

You no longer have to ask whether your lender will approve your PACE assessment. The Green Pace Companies secures Senior Construction lender financing with PACE pre-approval.

BENEFITS OF CONSTRUCTION (PLUS) PACE PROGRAM

Replaces the need for expensive mezzanine debt or preferred equity.

Long term low interest amortized financing with no short term balloon payments

Payments amortized over 20-25 years.
